

# Their eyes never lie.™

## Criminals lie all the time. We catch them every time, in seconds.

### AFFORDABLE

I.R.I.S.™ is very affordable.

Fully integrated with your existing jail or corrections management system, a complete I.R.I.S.™ costs less than \$15,000.

### PROTECTION

You'll always know, in seconds, who you have in custody and the risks they pose to your staff and communities.

### UNSURPASSED

The human iris is the most unique biometric identification visible on the human body.

### ACCURACY

On an typical day, BI2's I.R.I.S.™ system successfully performs over 72 million one-to-many matches of offenders from across the U.S.

### SPEED

An average search-and-match against the national database takes only 18.4 seconds.

**They thought they could get away with murder.  
They didn't plan on I.R.I.S.™**

### Real Cases.

An illegal alien from the Dominican Republic, who had been deported multiple times for drug and violent crimes, surgically and chemical destroyed his fingerprints. He illegally returned to the U.S. through Puerto Rico and was once again arrested on drug trafficking charges by a local police department. During his booking at the jail, he taunted the booking officers telling them that they would never be able to identify him. He hadn't planned on I.R.I.S.™ - in less than 15 seconds I.R.I.S.™ correctly identified him from BI2's national database on a record from 5 years earlier from a state 1,100 miles away.

### Real Results.

With the correct ID, ICE took him into custody. He's now in federal prison and we're all safer.

Accurate, quick and timely identification of offenders is a critical and fundamental responsibility of every jail and corrections facility.

*"This innovative biometric identification technology has been seamlessly integrated into our Jail Management System, and is already paying dividends in quick and error-free processing and data entry of offenders into our jail."*

**Keith McBrayer, Sheriff—Henry County, Georgia**

BI2's national iris biometric identification system takes just seconds to positively identify an offender.

*"It's a quicker and extremely accurate version of a fingerprint check."*

**Dave Pacholl, Commander—Anoka County, Minnesota**

BI2's I.R.I.S.™ biometric identification system better protects your citizens and communities while improving officer safety.

*"From an officer-safety perspective, to find out who we are dealing with in seconds is critical. This technology has literally leapfrogged us ahead in the ability of law enforcement to best protect our community."*

**Paul Babeu, Sheriff—Pinal County, Arizona**

I.R.I.S.™ stops inmates and detainees from escaping by impersonating another inmate. The Rhode Island Department of Corrections began using I.R.I.S.™ after an inmate escaped by impersonating another inmate.

*"Let's put it this way. Now that this system is in place, it is the last time that someone can pull that kind of stunt."*

**A.T. Wall, Director—Rhode Island Department of Corrections**

**No offender has ever been released by any agency using I.R.I.S.™ because of a false, bad or mistaken ID.**

**Simply Amazing.™**
